Contents

Precipitation and recrystallization in an Al–1·8%Mn alloy. P. L. Morris and B. J. Duggan 1

Method for quantitative study of inclusions taking part in ductile fracture process. D. J. Widgery and J. F. Knott. 8

Precipitation in aligned Al–Al_2Cu eutectic alloy. C. J. Davidson, I. O. Smith, and G. A. Chadwick. . . 12

Creep failure in Type 316 austenitic steel. D. G. Morris 19

Low cycle fatigue behaviour of a superplastic aluminium bronze. C. Gandhi, P. Rama Rao, and D. M. R. Taplin 30

Electron microscopy studies of point defect clusters in metals. B. L. Eyre, M. H. Loretto, and R. E. Smallman 35

Discussion: **Effect of hydrogen charging on nodularizing efficiency of a rare-earth alloy used in treating cast iron.** K. G. Davis and J.-G. Magny 51

Effects of excess silicon addition on ductility of Al–0·95%Mg_2Si alloy. J. Aucote and D. W. Evans. . . 57

Cyclic oxidation and crack growth during high strain fatigue of low alloy steel. R. P. Skelton and J. I. Bucklow 64

Influence of second-phase particles on diffusional creep. B. Burton and W. B. Beere 71

Corrosion fatigue in nickel steels. I. M. Austen, J. M. West, and R. Brook 77

Phase equilibria, isothermal reactions, and a thermodynamic study in the Co–W–C system at 1150°C. T. Johansson and B. T. Uhrenius 83

Effect of composition on the mechanical and stress-corrosion behaviour of Al–Zn–Mg alloys. W. S. Miller and V. D. Scott 95

Deformation-induced intergranular creep cavitation in alpha-iron. B. J. Cane. 102

Effect of texture on fatigue crack path in titanium–6Al–4V. R. M. Tchorzewski and W. B. Hutchinson . 109

Microstructural instabilities in metallurgical systems—a review. M. McLean 113

Bulk and grain boundary diffusion of ^{59}Fe, ^{51}Cr, and ^{63}Ni in austenitic stainless steel under influence of silicon content. W. Assassa and P. Guiraldenq 123

Hydrogenation effects in austenitic steels with different stability characteristics. H. Mathias, Y. Katz, and S. Nadiv 129

Equilibrium partition coefficients for ferrite/liquid and austenite/liquid in Fe–Cr–C alloys. B. A. Rickinson and D. H. Kirkwood 138

Thermodynamic and X-ray studies of fcc to fct phase transformations in In–Tl system. J. Patel and S. Ahmed 147

Strain hardening and rate-sensitivity effects on the ductile–brittle transition. W. W. Gerberich and Y. T. Chen. 151

Splat-quenching of high speed tool steels. J. J. Rayment and B. Cantor 156

Short communication: **History dependent creep of Ti–6Al–4V alloy.** I. Palchan and A. Rosen. 163

Faceting of interstitial loops in Cd and Zn. A. S. A. Karim, M. E. Whitehead, M. H. Loretto, and R. E. Smallman 167

Creep cavitation by vacancy diffusion in plastically deforming solid. W. Beere and M. V. Speight. . . . 172

Early stages of oxidation of metallic iron in carbon dioxide. G. C. Allen, I. T. Brown, and R. K. Wild . 177

Effect of grain boundaries on anneal hardening in Cu–Al alloy. S. Miura and T. Tajima. 183

Hydrogen-assisted cracking in a high-strength steel. M. J. Stowell, J. Davenport, and K. J. Gradwell . . 192

Sulphur diffusion in silver and copper single crystals. J. Ladet, B. Aufray, and F. Moya 195

Enthalpies of formation of ordered iron–cobalt alloys. F. Arslan, H. B. Bell, and D. B. Downie 198

Influence of angle between grain boundary and precipitate habit plane on intergranular morphology of θ' in Al–Cu. B. Forest and M. Biscondi. 202

Plastic zones around creep and fatigue cracks at 650°C in Type 304 stainless steel. Y. Iino. 207

Application of electron energy loss spectrometry to precipitate microanalysis in 9%Cr–1%Mo steel. R. D. Leapman, S. J. Sanderson, and M. J. Whelan. 215

Short communication: **Microstructural instabilities during creep of 9%Cr–1%Mo steel.** S. J. Sanderson . 220

Effect of microstructure on fatigue in threshold region in low-alloy steel. J. P. Benson and D. V. Edmonds 223

Volume contractions accompanying solidification of aluminium–copper alloys. T. W. Clyne and G. J. Davies 233

Mechanism of nodularization of graphite in cast irons treated with magnesium. S. Yamamoto, B. Chang, Y. Kawano, R. Ozaki, and Y. Murakami 239

Effects of hydrostatic tension on cleavage fracture of pure polycrystalline zinc. D. A. Curry, J. E. King, and J. F. Knott. 247

Contents

Problems associated with early stage fatigue crack growth. W. J. Plumbridge 251

Enhanced growth of precipitates in Al–4%Cu alloy under irradiation. L. Weaver, B. Hudson, and J. Nutting 257

Short communication: **Densities of fcc nickel–iron alloys.** W. J. Tomlinson and A. J. Andrews 263

Short communication: **Relationship between minimum creep rate and time to fracture for $2\frac{1}{4}$%Cr–1%Mo steel.** D. Lonsdale and P. E. J. Flewitt 264

Quantitative analysis of carbides formed during the tempering of tungsten and molybdenum steels. R. J. Tunney, G. W. Lorimer, and N. Ridley 271

Bauschinger effects and work-hardening in spheroidized steels. Y. W. Chang and R. J. Asaro 277

Effect of ageing at 170°C on acoustic emission during deformation of Al–4%Cu. H. N. G. Wadley and C. B. Scruby 285

Mechanism of dissolution-controlled cracking. J. C. Scully. 290

Short communication: **Stress dependence of steady state creep rate of cobalt in relation to phase change.** R. Kamel and K. H. Georgy. 300

Structural inhomogeneity of deformed austenitic stainless steel. M. Blicharski and S. Gorczyca 303

Grain-boundary sliding as a correlating concept for fatigue hold-times. D. McLean and A. Pineau . . . 313

Modification of Richard's rule and correlation between entropy of fusion and allotropic behaviour. G. P. Tiwari 317

Diffusional growth of creep voids. J. E. Harris. 321

Quantitative examination of slip-dissolution and hydrogen-embrittlement theories of cracking in aluminium alloys. F. P. Ford 326

Present ideas about mechanisms of hydrogen embrittlement of iron and ferrous alloys. M. Cornet and S. Talbot-Besnard 335

Short communication: ***In situ*** **electron microscopy of strain-induced hydrides in α-titanium alloy.** I. W. Hall and C. Hammond 339

Deformation structures and textures in cold-rolled 70 : 30 brass. B. J. Duggan, M. Hatherly, W. B. Hutchinson, and P. T. Wakefield 343

Zinc transfer from galvanized wire to AISI 316 stainless steel at 550°C. J. E. Cordwell 352

Origin of gas bubbles in aluminium. S. N. Tiwari and J. Beech 356

Calculated Al–Ti–Si phase diagram and interpretation of grain refinement results. W. V. Youdelis . . . 363

Ageing characteristics of VC, TiC, and (V, Ti)C dispersions in ferrite. G. L. Dunlop and R. W. K. Honeycombe 367

Influence of precipitation on recrystallization and texture development in an iron–1·2% copper alloy. W. B. Hutchinson and B. J. Duggan 372

Progress of NbCN precipitation in HSLA steels as determined by electrical resistivity measurements. R. Simoneau, G. Bégin, and A. H. Marquis 381

Short communication: **Thermal analysis of gold–thallium alloys containing 29·2–100 at.-% thallium.** D. S. Evans and A. Prince 386

Strength of γ' hardened nickel-base alloy. A. Melander and P. Å. Persson 391

Photoemission electron microscopy of growth of grain boundary ferrite allotriomorphs in chromium steel. D. V. Edmonds and R. W. K. Honeycombe 399

Detection of defects in opaque solids using visualized ultrasound. G. J. Hardy, T. W. Turner, and K. H. G. Ashbee. 406

Thermal analysis of Ga–In–Sn system. D. S. Evans and A. Prince 411

Kinetics of precipitation of χ-phase and $M_{23}C_6$ carbide in a cast of Type 316 stainless steel. J. K. L. Lai and M. Meshkat 415

Modification of texture by fatigue and its application to fatigue metering. M. E. Packer and R. A. Coyle . 421

Structure and properties of heavily cold-worked fcc metals and alloys. J. Nuttall and J. Nutting 430

Coarsening of aligned Cu–In eutectoid. B. G. Mellor, D. V. Edmonds, and G. A. Chadwick 439

Effects of deformation on the decomposition of austenite: Part I—The ferrite reaction. D. J. Walker and R. W. K. Honeycombe 445

Friction-stress measurements during high-temperature creep of polycrystalline copper. J. D. Parker and B. Wilshire. 453

Critical stress for delamination fracture in HSLA steels. G. Baldi and G. Buzzichelli. 459

Secondary recrystallization by grain boundary unsewing in Al–1 wt-%Mg_2Si alloy. H. Westengen and N. Ryum 473

Contents

Precipitation in Al–Cu–Mg–Ag casting alloy. J. A. Taylor, B. A. Parker, and I. J. Polmear 478

Structural aspect of decomposition of metastable γ-Mn–Cu alloys. N. Cowlam 483

Short communication: **Three-dimensional strain compatibility model for fatigue striation formation.** D. W. Hoeppner 489

Measurements of intergranular failure produced during fatigue crack growth in quenched and tempered steels. P. E. Irving and A. Kurzfeld 495

Compositional dependence of oxidation rates of NiAl and CoAl. R. Hutchings and M. H. Loretto . . . 503

Effects of microstructure on cleavage fracture stress in steel. D. A. Curry and J. F. Knott 511

Accuracy of tracer diffusion measurements in iron–chromium system using tracer analysis. P. J. Alberry and W. S. Kyte 515

Thermodynamics of microsegregation and influence of elements on structure of unalloyed and alloyed cast iron. A. A. Zhukov 521

Creep and rupture in Type 316 stainless steel at temperatures between 525 and 900°C. D. G. Morris and D. R. Harries

Part I: Creep rate 525

Part II: Rupture and ductility 532

Part III: Precipitation behaviour 542

Structure of well-defined deformation bands and formation of recrystallization nuclei in aluminium. A. Kriesler and R. D. Doherty 551

Rates of nitriding and nitride composition in austenitic steels containing titanium. J. M. Silcock 561

Fatigue-hardening and high-cycle fatigue life of copper and Cu–Zn alloy under reversed bending. L. P. Karjalainen 571

Turbulent flow and solidification: stir-cast microstructure. A. Vogel 576

Significance of crack opening displacement and crack tip plastic strain energy in fracture initiation. T. Shoji, H. Takahashi, and M. Suzuki 579

Strength of hardmetals. E. A. Almond 587

Diffusive crack growth in plastically deforming solid. W. Beere and M. V. Speight 593

Short communication: **Thermal analysis of In–Pb system.** D. S. Evans and A. Prince 600

Book reviews and notices 76, 166, 197, 302, 312, 388, 493, 550
